

ROBO ARM

- Emotional Support
 1. Advertisement: Every year, millions of engineering students suffer from... zero compliments. When was the last time you got patted on your head and were told "Good job, you did well". When was the last time, you felt emotionally supported? Introducing our emotional robotic arm.
 2. Action: We can show two actions: a. Person is sad, robot detects it, plays music and gives a thumbs up. Music can be: Never gonna give you up, never let gonna let you down or some other songs depending on facial expression, If feeling better: I believe I can fly, I believe bla bla. Second shot, b. Patting your head, and saying "good job, you did well"
- Hand Shake
 1. Advertisement: Have you ever been left hanging? Missed a fist bump? Accidentally turned a dap into a business meeting? Introducing CoolKid Arm — Never Lose a Handshake Again, and you'll be cooler than ever
 2. We can do series of hand movement like fist bump, pointing, side dap, finger point, exploding fist bump etc.
- Dog poop
 1. Advertisement: Sick of carrying ur dog's poop, its disgusting isn't?? Introducing PoopPicker - a robotic arm, that can grab your dog's poop for you. Scene can be with a sad piano music when the owner sees their dogs poop.
 2. Action: It will scan a small area, detect the poop, pick it up with plastic like put the plastic around its finger (hands open) then it grabs the poop.
- DJ hand
 1. Advertisement(Fake nightclub commercial): DJ arm now with artificial rhythm. Scene can be one guy eating chips alone, sad elevator music playing, sick of boring parties? Tired of pretending the music is good? Introducing..
 2. Action: Robot scratches fake turntable, presses music button, raises hand during beat drop, waves at crowd. Robot can maybe detect people's expressions, and if they are low etc play high beat drop(just an idea)
- Watering Capabilities
 1. Advertisement: Sick of your plants dying, maybe you are the problem? Worry not, if you are away, u can just leave ur plants to our robotic arm. It can detect the soil color and see if the water is need and if it is, then it let it pour the water u put in the container. Introducing WaterGpt
 2. Action: we can make like a container holder and check the soil color and make a movement such that the water will drop.
- Scratcher

1. Advertisement: Ever had an itch on your back... exactly where your hand cannot reach? Stop suffering. Stop rubbing yourself. Introducing BackScratchBot
 2. Action: starts scratching up/down, user says more left , arm rotates left and user says more right, arm rotates right
- AI agent for street viewer (need to do more research on this, basically Antonio said robotic arm will be with us and tell us our route to walk, mainly for disabled people)
 - Rock paper scissors
